

SaFTFlo® Docking Station

The RD Industries patented SaFTFlo® Closed Loop System provides superb chemical containment and is designed to minimise leaks, spills, and exposure to chemicals.

The SaFTFlo® Docking Station simplifies the process of connecting concentrates to a wall-mounted dispensing unit. This system protects employees and your business from costly accidents on the job.

Key Features

- Protects end-users and the environment from spills
- Limits end-user contact
- Eliminates mixing mistakes

Materials / Options

- Liquid color matching available
- Company colour matching available

Installation

The SaFTflo® Docking Station can be mounted directly to the wall or placed on a shelf. Black cabinets are available to fit one-gallon round bottles.

To install the docking station:

Remove the shipping closure so that the bottle insert is visible.

Slide the bottle into the base of the black cabinet holder.

Turn the lever to the docking station into place.

The chemical concentrate or liquid is ready to be dispensed.

For superior performance results, use the SaFTFlo® Docking Station in conjunction with our full line of liquid containment and dispensing products from the SaFTFlo® Fluid Management Systems.
