

## SaFTFlo® Dual Port Cap Adapter

The SaFTFlo® Dual-Port Cap Adapter is designed for dispensing one product to two different dispensers from a single container of chemical.

This is an excellent solution for large chemical dispensing or when looking to reduce the number of bottles or mixing stations in a work area.

### Key Features

- Accurate dilutions - the dual-port cap adapter is designed to only draw from one port at a time; thus reducing the chances of improper dilutions
- Dry break valve
- Dual-ports allow for multiple flow and dilution rate combinations, depending on your customer's needs
- Dual-ports allow for dispensing from one chemical bottle to two different machines/ dispensers; thereby conserving space in tight quarters

### Materials / Options

- Standard and medium flow rates
- Proprietary key lock
- Sizes: 38mm, 40mm, 53mm, 60mm, 63mm
- Materials: Wide range of plastic for chemical compatibility
- For color options please contact your sales representative

For superior performance results, use the SaFTFlo® Dual Port Cap Adapters in conjunction with our full line of liquid containment and dispensing products from the SaFTFlo® Fluid Management Systems.
