

SaFTFlo® Hand Pump

The SaFTFlo® Hand Pump Dispenser offers the ease of portable dispensing while providing safe chemical containment. No water supply is needed, which makes this hand pump dispenser ideal for use on countertops, mobile carts, and low-chemical-use areas.

The SaFTFlo® Hand Pump Dispenser integrates with your closed loop chemical containment and dispensing system, using the 'lock and key' concept. With a SaFTFlo® insert in your bottle, the chemical is locked inside until the hand pump dispenser is attached to the bottle.

The SaFTFlo® system is spill-resistant and holds prime after initial use.

Key Features

- Preset dilution
- Precise dispensing
- Durable, ergonomic design
- Color coding available - design your own system

Materials / Options

- Dose amounts: ¼, ½, and 1 ounce
- Logo printing/branding available
