

SaFTGreen™ Pierce Pin Cap

The SaFTGreen™ Pierce Pin Cap Adapter is a revolutionary cap adapter that uses a lance to pierce the sealed valve of the SaFTGreen™ SPP, enabling the flow of chemical.

Until the lance is inserted into the valve, the liquid is totally sealed within the container.

The cap adapter provides a better flow rate. A cross slot valve prevents the chemical line from emptying when changing chemicals, ensuring no chemical contact and a reduction in waste.

Key Features

- The world's first cap adapter to use a lance to release chemical flow
- When used with the GREENSEAL™ SPP, the highest level of seal-ability in the market is achieved
- Works with GREENSEAL™ SPP, GREENSEAL™ TP, GREENSEAL™ MSV
- Cross slot valve prevents the chemical line from emptying when changing chemicals
- Low manufacturing impact on the environment

Materials / Options

- Standard and medium flow rates
- Straight barb top housing
- Sizes: 28 mm, 38 mm, 40 mm, 53 mm, 60 mm, 63 mm, 70 mm
- Materials: Polypropylene , Kynar, EPDM, Metallocene, Viton
- For color options please contact your sales representative

For superior performance results, use the SaFTGreen™ Pierce Pin Cap Adapters in conjunction with our full line of liquid containment and dispensing products from the SaFTFlo® Fluid Management Systems.

*Please note adding some of the options above, will reduce the ability to recycle the insert, including adding color.
