

SaFTGreen™ SP Insert

The SaFTGreen™ SP offers the latest, advanced technology in a revolutionary, patented insert that is sustainably manufactured and 100% recyclable.

Used in conjunction with the Pierce Pin Cap Adapter, this insert offers the highest level of sealable insert on the market. The patented TPE over-mold technology is found around the insert, and as a lip that sits on top of the bottle neck, under the ship cap. Bi-directional valves allow for better venting and off-gassing, reducing the ability for the container to panel or bloat.

The flow channel can only be opened when punctured with the lance of the Pierce Pin Cap Adapter.

Key Features

- Highest level of sealable insert in the market
- Large range of chemical compatibility
- Flow Channel is punctured by the Pierce Pin Cap Adapter
- Premium venting to allow for better off-gassing and prevention of panelling
- Designed to fit most 38mm bottles
- Patented TPE over-mold on all sealing surfaces
- 100% recyclable
- Sustainable manufacturing
- No metal parts in assembly, i.e. no springs
- Low manufacturing impact on the environment

Materials / Options

- Tamper Evident Compatible
- Key lock combinations
- Metering tip
- Additional colors are charged as an extra option
- Standard and medium flow rates available
- Materials: HDPE | Polyethylene Base TPE over- mold
- For color options please contact your sales

For superior performance results, use the SaFTGreen™ SP Insert in conjunction with our full line of liquid containment and dispensing products from the SaFTFlo® Fluid Management Systems.

*Please note adding some of the options above, will reduce the ability to recycle the insert, including adding color.
