

## Benefits

- Best seal on the market
- Compatible with both existing SaFTFlo® cap adapters and SaFTGreen™ PiercePin cap adapter
- Large range of chemical compatibility
- Premium venting to allow for better off gassing which prevents panelling and bloating of container
- 100% recyclable
- Sustainably manufactured

## Key Features

- Designed to fit most 38mm bottles
- Flow Rates: standard and medium
- GreenSpring™ technology
- Patented TPE over-mold on all sealing surfaces
- Automatic, bi-directional self-venting
- Materials: HDPE sub straight with a TPE over-mold
- Compatible with Tamper Evident: HDPE 0.18 lugs, 0.22 lugs, 0.250 lugs
- Key Lock Options available.
- Compatible with metering tips - 32 dilutions
- Contact your Sales Representative for color options
- No metal parts in assembly, i.e. no springs
- Low manufacturing impact on the environment

## Compatible Products

- SaFTFlo® Cap Adapters
- PiercePin Cap Adapter

## Industries Used In:

Hotels

Schools

Health Spa /  
Gym

Hospitals

Grocery Stores

Patent Number: 10,508,016

## What is it and how does it work?

The SaFTGreen™ Slide Valve Insert offers the latest in closed loop technology. A patented design and manufacturing process make this part of the world's first recyclable and sustainably manufactured range of bottle inserts for chemical containment and dispensing.

A TPE, soft-seal over-mold around the plug and on the shoulder of the insert offers a superior seal for both dispensing and transportation chemicals.

Compatible with both SaFTFlo® cap adapters and the SaFTGreen™ PiercePin cap adapter, the Slide Valve bottle insert is the most versatile product within the SaFTGreen™ range. The valve in the insert is fully sealed until a cap adapter is connected, pushing the snap stem valve to establish chemical dispensing. Once the cap adapter is removed, the valve will re-seal itself to ensure a full seal once again.
