

Butress Thread

VThread

Benefits

- Provides a closed-loop solution for chemical containment and dispensing for large containers
- Prevents leaks and spills during transportation
- Protects end-users when handling chemical concentrates
- Enables customers to ship large containers of chemical concentrate with added security
- Allows end-users to dispense directly from large containers of chemical concentrates
- Works with industry-standard sizes

Key Features

- Fits industry standard 2" bung threads or pails and drums
- Available in standard and medium flow rates
- Works with the 38mm SaFTFlo® cap adapters
- Materials:
 - Plug: HDPE
 - Venting: PE Foam Liner
 - Spring: Hastelloy, Stainless Steel
- Keylocks available

Compatible Products

- 38 mm SaFTFlo Cap Adapter

What is it and what does it do?

The SaFTFlo® Bung Adapter offers a closed-loop containment and dispensing solution for larger containers.

The Bung Adapter fits the industry standard 2" bung threads or pails and drums and is available in both a V-thread (fine) and butress (coarse) thread profile.

A standard 38mm SaFTFlo® cap adapter is connected to the bung adapter to establish chemical flow for closed-loop dispensing.
