

CLOSED-LOOP TECHNOLOGY

Bagged Containers

What it is How it Works

The OneFlo™ Pouch Adapter was designed specifically to fit into bags. The only one of its kind in the marketplace, it brings Closed-Loop technology to bag containers.

Bag containers are increasingly popular for chemical concentrate because of the cost savings associated with using them. Due to their space-saving properties, they reduce shipping costs, and product waste is minimized as end-users can empty 100% of the chemical from the bag.

Industries That Use These Products

Janitorial

Sanitation

Laundry

Warewash

Animal Health

Benefits

- Compatible with OneFlo™ 38mm Cap Adapter
- Provides Closed-Loop solutions for chemical containment and dispensing for bags
- End-user can dispense safely and directly from the bag
- Lower shipping and transportation costs due to spacesaving properties of a bag
- Truly recyclable since end-user can empty 100% of the chemical from the bag
- Made in Omaha, Nebraska USA

Key Features

- Fully Closed-Loop system
- Compatible with off the shelf Scholle bags
- 32 dilution rates available
- Key lock options available for additional seal and security
- Sustainably manufactured
- Available in natural or 11 colors
