

THE NUMBER ONE

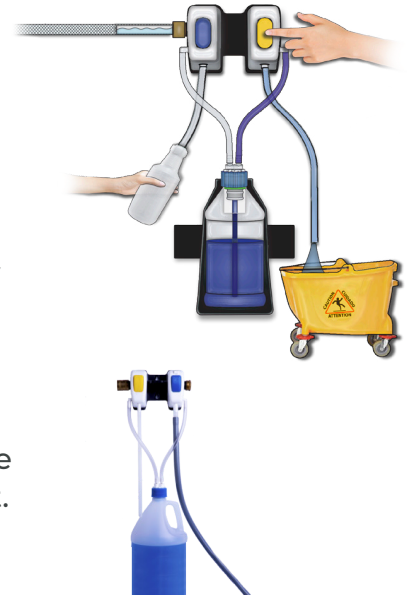

Low-Cost | Maintenance Free Chemical Dispensing Solution

What it is How it Works

The Saftflo Wall Dispenser offers a simple chemical dispensing system. It reduces costly maintenance calls as the simple system provides for easy user repair.

Offering the flexibility of a one or two part module, a choice of flow rates, and interchangeable Kynar metering tips, it delivers accurate dilution for use in many applications. RD Industries Saftgap™ is a patented technology offering air-gap and a one-way check valve for increased performance and safety.

Simple to install and operate, this compact unit can fit into small places or scaled up by connecting multiple dispensers. Customizable to suit your needs and designed to ensure chemical concentrates do not come into contact with the working parts. The lifetime of this unit is increased compared to others on the market. As a part of the RD Industries Closed-Loop family, The Saftflo Wall Dispenser provides superior safety for your team and will help meet your sustainability goals!

Benefits

- Compatible with Saftflo Inserts | Saftflo Cap
- Adapters | Saftflo Fluid Monitor
- Low cost to fix
- Quick and easy to install
- Accurate dilution and superior flow rates
- Less need for external service repair engineers
- Increased safety for your team
- Made in Omaha, Nebraska USA

Key Features

- One or two port modules
