Bulkhead Adapter

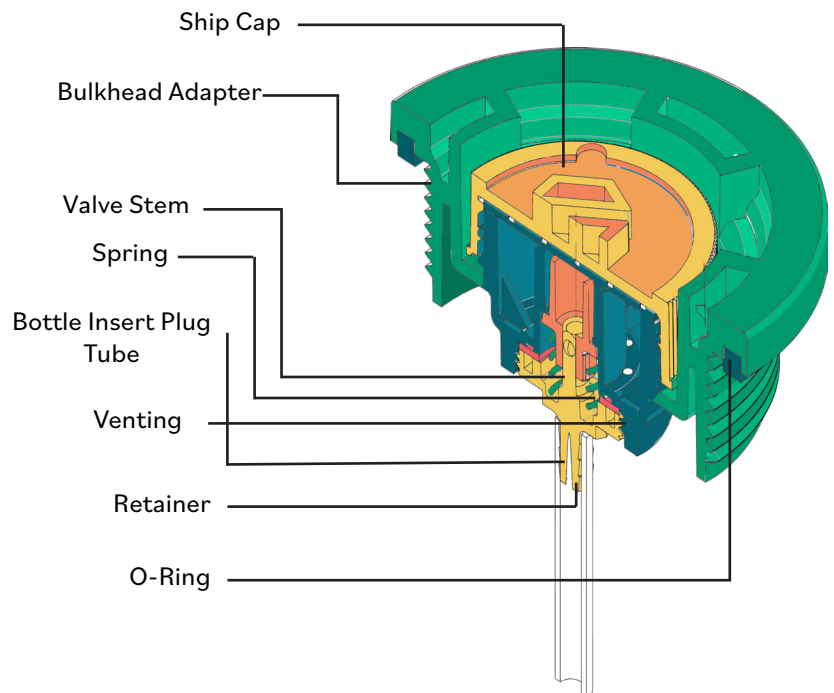

Safest Solution for the Containment & Dispensing of Chemical Concentrate from Large Containers

Shipping large containers of chemical concentrate can be hazardous, but the Saftflo Bulkhead Adapter is the perfect solution.

No chemical contact for any employees or transport teams making it the safest way to contain and dispense your chemical concentrate.

The Bulkhead Adapter fits the industry standard 2" pails and drums and is available in both a V-thread (fine) and buttress (course) thread profile. A standard 38mm Saftflo Cap Adapter is connected to the Bulkhead Adapter to establish chemical flow for Closed-Loop dispensing.

The Saftflo Bulkhead Adapter offers a Closed-Loop containment and dispensing solution for big containers.
