

## Dual Port Cap Adapter

Excellent Solution For Chemical Dispensing

### BENEFITS

- Compatible with OneFlo™ and Saftflo™ Inserts | Saftflo™ Wall Mount | Saftflo Docking Station | Saftflo Fluid Monitor
- Dual Ports allow for dispensing from one chemical bottle into two different dispensers
- Allows for multiple flow | dilution rate combinations, depending on your customers needs
- Designed to only draw from one port at a time; reducing the chances of improper dilutions
- Dry break valve reduces waste and ensures clean changeover of chemical

### KEY FEATURES

- Standard | Medium flow rates
- Sizes: 38mm | 40mm | 53mm | 60mm | 63mm | 70mm
- Plug Materials: Ploypropylene | EPDM | Kynar
- Valve Materials: Viton | Metallocene EPDM
- Proerietary key lock options available

**PATENT: 6,669,062 | 9,854,838**

The Saftflo™ | OneFlo™ Dual Port Cap Adapter is designed for dispensing one chemical into two types of dispensers requiring different dilutions, for example one dilution into a trigger bottle for window applications and another into a mop bucket for floor applications.

This is an excellent solution for those using large containers to dispense chemicals from and those wanting to reduce the number of bottles or mixing stations in a work area. It also is a great time save not having to chnage over containers for a variety of applications.

**Made In USA**
