

# ProValve Insert

## Turn Any Container Into a Portable Dispensing Unit

### BENEFITS

- Compatible with your existing SaTFlo Cap Adapters and OneFlo™ Cap Adapters
- No metal parts allow for the widest range of chemical compatibility - one insert for all of your products
- Premium venting allows for ideal off-gassing and prevents container paneling and bloating
- Truly recyclable

### KEY FEATURES

- Fits most 38mm and 40mm bottles
- Best flow rate on the market
- 32 metering options allow you to choose the dilution you need
- Automatic, bi-directional self-venting
- Sustainably manufactured

The OneFlo™ ProValve Insert offers the latest in Closed-Loop technology. This patented design and manufacturing process makes this part of the world's first truly recyclable and sustainable manufactured line of Bottle Inserts for chemical containment and dispensing.

A soft seal is around the plug and over the neck finished to offer a superior seal for both dispensing and transport. It's the only insert with bi-directional valves that allows for better venting and off-gassing, reducing the ability for the container to panel or bloat.

The ProValve Bottle Insert is the most versatile product within the OneFlo™ line. It's compatible with most caps including SaTFlo Cap Adapters and OneFlo™ Cap Adapters.
