

Dual Port Cap Adapter

PATENT: 8,702,203
MADE IN THE USA

Convenient Solution for Chemicals with
Dual Dilutions or Applications

► What is it and what does it do?

The **SaftFlo® Dual Port Cap Adapter** is designed for dispensing one chemical into two different types of dispensers requiring different dilutions, e.g. one dilution into a trigger bottle for window applications and another into a mop bucket for floor applications.

This is an excellent solution for those using large containers to dispense chemicals from and those wanting to reduce the number of bottles or mixing stations in a work area. It is also a great time saver not having to change over containers for different applications.

► BENEFITS

- Allows for multiple flow and dilution rate combinations, depending on customer's needs
- Accurate dilutions - the Dual Port Cap Adapter is designed to only draw from one port at a time: thus, reducing the chances of improper dilutions
- Dry break valve reduces waste and ensures clean changeover of chemical

► KEY FEATURES

- Available in standard and medium flow rates
- Sizes: 38mm, 40mm, 53mm, 60mm, 63mm, 70mm
- Materials Included:
 - Plug: Polypropylene, EPDM, Kynar
 - Valves: Viton, Metallocene, EPDM
- Proprietary key lock available
- Please contact your sales representative for color options
