

Cap Adapters - The Key

PATENT: 5,165,578
MADE IN THE USA

An Integral Part of Closed Loop Technology

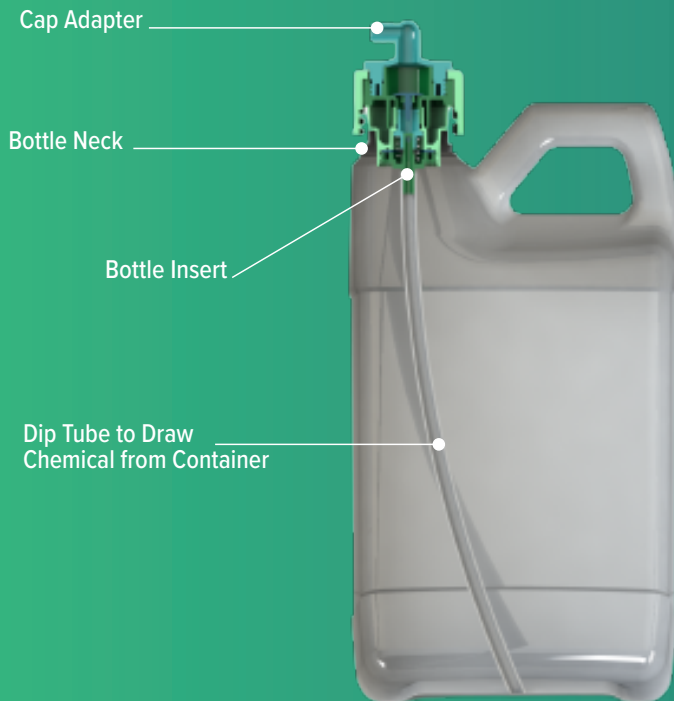

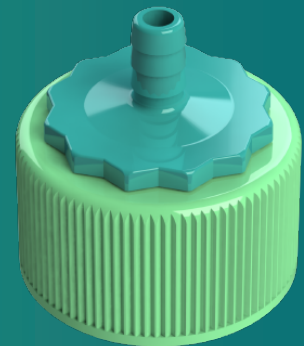

► What is it and what does it do?

The **SaftFlo® Cap Adapter** is a critical component to the Closed-Loop system, as it serves as the key to “unlock” the chemical from the container when needed for dispensing. The end-user removes the ship cap and replaces it by attaching the cap adapter on the container’s neck fitted with a bottle insert to dispense chemical.

When the Cap Adapter or “key” is connected, the keylock opens the spring loaded valve in the insert to “unlock” the chemical from the container, taking it directly into the dispenser with no contact to handlers.

When the Cap Adapter is removed from the container, the valve closes automatically to lock the container’s chemical and prevent leaks or spills. The **SaftFlo® Cap Adapter** is available in an extensive range of sizes, two flow rates, and numerous material options to accommodate a broad range of chemicals.

► BENEFITS

- Allows chemical flow within a Closed Loop system
- Provides safe dispensing of harmful chemicals
- Compatibility of a large range of chemicals
- **SaftFlo®** has the largest range of Cap Adapters on the market

► KEY FEATURES

- Sizes: 28mm, 38mm, 40mm, 53mm, 60mm, 63mm, 70mm, bungs
- Flow Rates: Standard and Medium
- Top housing customization options: Straight Barb - 1/4”, 1/2”, 3/8”, 90° Barb, 90° Swivel Barb, Dual Port, NPT
- Materials Included: Polypropylene, Kynar, EPDM, Metallocene, Viton
- Key locks available
- Please contact your sales representative for color options
