

ProValve Insert

Environmentally Preferred Solution
to Closed Loop Containment

PATENT: 10,576,702
PATENT: 10,640,359
MADE IN THE USA

► What is it and what does it do?

The **OneFlo™ ProValve Insert** offers the latest in Closed-Loop technology. This patented design and manufacturing process makes this part of the world's first truly recyclable and sustainable manufactured line of Bottle Inserts for chemical containment and dispensing.

A soft seal is around the plug and over the neck finish to offer a superior seal for both dispensing and transport. It's the only insert with bi-directional valves that allows for better venting and off-gassing, reducing the ability for the container to panel or expand.

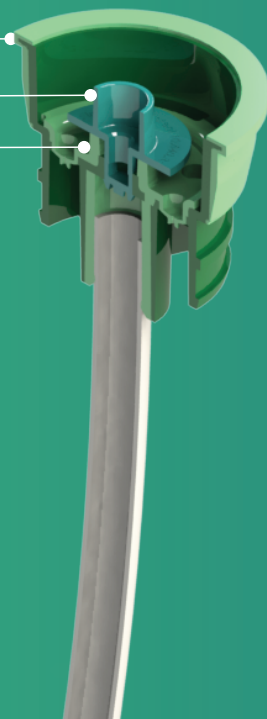

The **ProValve** Bottle Insert is the most versatile product within the **OneFlo™** line. It's compatible with the most caps including **SafTflo** Cap Adapters and **OneFlo™** Cap Adapters.

Softseal Over-Mold
on Insert Flange

Key Lock Valve

Automatic, Bi-Directional Venting

► BENEFITS

- Increased flexibility with bottle neck variances
- No metal parts allow for the widest range of chemical compatibility - one insert for all of your products
- Premium venting allows for ideal off-gassing and prevents container paneling and expanding
- Truly recyclable

► KEY FEATURES

- Fits most 38mm and 40mm bottles
- Best flow rate on the market
- 32 metering options allow you to choose the dilution you need
- Automatic, bi-directional self-venting
- Sustainably manufactured
